

SECURITY RISK ASSESSMENT

IS YOUR BUSINESS SAFE FROM CYBER ATTACKS?

BCS365 understands that safeguarding your business against cyber threats is critical. That's why we are thrilled to introduce our **comprehensive Security Risk Assessment**, designed to empower your organization.

What's Included in the Assessment?

This all-encompassing assessment incorporates **four vital components**, ensuring your organization's security is impenetrable:

-  **Penetration Testing:** Our meticulous pen testing evaluates your system's resilience against real-world attacks.
-  **Internal Vulnerability Scan:** This process reviews your internal network for any potential weaknesses.
-  **3rd Party Risk Report Card:** We provide an external Risk Report Card from an independent 3rd Party Service.
-  **Detailed Findings Report Review Session:** We will present a comprehensive breakdown of your assessment results, offering you a detailed view of potential risks and empowering you to take action.

Tailored Follow-Up Options

- 01 Comprehensive BCS365 Service Agreement:** Engage our team to resolve all vulnerabilities found in the trial. Our experts will deploy tools to monitor, alert, and patch your endpoints on an ongoing and proactive basis to ensure 24/7/365 protection.
- 02 Fixed Price Remediation Project:** Choose our one-time project fee to remediate the issues uncovered during the trial, allowing you to address additional vulnerabilities on your own going forward.
- 03 Independent Use:** Take the findings report and use it on your own to implement independent remediation steps.

Take the First Step Towards Securing Your Business

Don't wait for a cyber-attack to expose your network's vulnerabilities! **Take advantage of our exclusive comprehensive Security Risk Assessment to uncover potential risks to your organization and fortify your defenses.**
